Continuing education
field theory for nursing information system implementation and, 80
organizing framework for nursing informatics research, 316
sepsis alert and diagnostic system, 22
standardized nursing language and, 128
Conversations, computerized content analysis of, 249
Cumulative trauma disorders, avoiding with ergonomics, 150
Curriculum, Web-supported, transition to, 309

D
Data collection
interactive, 120
remote data entry system requirements for collection of clinical trial data for cancer and, 234
Decision support systems, for cancer pain management, 206
Distance education, in China, integrating Web-based technology into, 265
Diversity, flexible approaches and nurse education and, 259
Doctoral education, online doctoral program announced by University of Arizona and, 71

E
Editorials, Teaching an Old Dog New Tricks, 59
Educational technology, transition to Web-supported curriculum, 309
eHealth Institute, Award for Application Exceilence in Online Continuing Education announced by, 7
Electrocardiography, PDA capability for, 293
Electronic art, *Computers in Nursing* requirements for, 173
E-mail. *See also* Internet
decision support program for cancer pain management and, 12
End-of-life care, teaching materials for, 29
Ergonomics, applying to workstations, 150
Ethnicity, decision support program for cancer pain management and, 12
European Commission, policy document on quality criteria for health Web sites, 71
Expert systems, decision support program for cancer pain management and, 12

F
Field theory, for nursing information system implementation, 80
Food and Drug Administration, bar coding rules proposed by, 175

G
Gender, decision support program for cancer pain management and, 12
Google, synonym search added, 293

H
HandyVaid, 68
Healthcare Computing 2003 meeting, 174
Health Level 7 Reference Information Model, 37
Hermeneutics, 300
Home care nurses, attitudes toward computers, 103

I
Informatica 2003 meeting, 173
Informatics training for Global Health, 232
Information systems
Lewin's force field analysis for implementing, 80
nursing self-efficacy of, 198
Institute of Electrical and Electronics Engineers, standards for secure operating systems and, 291
Intensive care unit, sepsis alert and diagnostic system for, 22
Interactive data collection, 120
International Medical Informatics Association
Open Source working group formed by, 287
Special Interest Group on Nursing Informatics Web site launched by, 178
Internet
bedside access to, in U.K. hospitals, 61
cancer support groups on, 136
decision support program for cancer pain management and, 12
European Commission policy document on quality criteria for health Web sites and, 71
integrating Web-based technology into distance education in China, 265
mapping of health and medical resources on, 115
PDA utility survey on, 177
pornography filters and, blocking of health content by, 67
practice-related information on, criteria used to evaluate, 97
SPAM and, attempts to curb, 158
transition to Web-supported curriculum, 309
virtual focus groups and, 300
Web application for recording and analyzing clinical experiences of nursing students, 186
Web site development and, 143
Internet2, unveiling of, 65
Internet scams, efforts to curb, 5
Intravenous nurses, personal digital assistant use by, 179

J
JustWrite online writing course, 292

L
Libraries, creating in bibliography database managers, 48
Life support care, LSTAT platform for, 72

M
Mass disasters, response to, informatics' role in, 1
Medication administration, for children, education software on, 218

Meetup.com, Cybermedicine group formed at, 290
Modeling, Health Level 7 Reference Information Model and, 37

N
National Library of Medicine, Internet2 unveiling by, 65
National Technical Information Service, report availability announced by, 8
NCLEX, relationship between computer testing during nursing programs and performance on, 326
Nurse practitioners, standardized nursing language and, 128
Nursing education. *See also* Continuing education; Online education
  for end-of-life care, teaching materials for, 29
  flexible approaches for crossing cultural boundaries and, 259
  student satisfaction with technology-enhanced learning and, 241
  transition to Web-supported curriculum, 309
Nursing informatics organizations, 275
Nursing information systems, Lewin's force field analysis for implementing, 80
Nursing language, standardized, 128

O
Online cancer support groups, 136
Online education
  integrating Web-based technology into distance education in China, 265
  JustWrite online writing course, 292
  online doctoral program announced by University of Arizona and, 71
  transition to Web-supported curriculum, 309
  Web application for recording and analyzing clinical experiences of nursing students, 186
Openclinical.org, publications announced by, 4

P
Pain. *See* Cancer pain
Patient education, computers in, 88
Patient transport, LSTAT platform for, 72
PDAs (personal digital assistants), EKG capability for, 293
Pediatric nursing, education software on medication administration for, 218
Personal digital assistants
  Internet survey on utility of, 177
  point of care use of, 179
Pew Internet & American Life Project, 227
Point-of-care technology, nurses' attitudes toward, 103
Pornography filters, blocking of health content by, 67
Professional Development Software Inc., Web site launched by, 292
Public Health Informatics Institute, funding of, 113

Q
QRS Diagnostic, EKG capability for PDAs announced by, 293

R
Reference Manager, v. 10, 113
Repetitive stress injuries, avoiding with ergonomics, 150
Research, organizing framework for nursing informatics research, 316
Robert Wood Johnson Foundation, funding of Public Health Informatics Institute by, 113

S
SCOTTeVEST, clothing line introduced by, 293
Self-efficacy, of information system, 198
Sepsis, alert and diagnostic system for, 22
Sigma Theta Tau, applications for 2003 technology awards and, 71
Silicon Graphics, Inc., settlement of export control violation charges by, 69
Software, decision support program for cancer pain management and, 12
Software reviews
  The Basic Principles of Pharmacology, 55
  Bioterrorism Simulator, 55
  Cardiovascular Anatomy and Physiology, 227
  Reference Manager, v. 10, 113
Spam, efforts to curb, 5, 158
Special Interest Group on Nursing Informatics Web site launch, 178
Standardized nursing language, 128

T
Transport of patients, LSTAT platform for, 72

U
Unified modeling language, Health Level 7 Reference Information Model and, 37
United Kingdom, bedside Internet access in hospitals in, 61
University of Arizona, online doctoral program announced by, 71
US Army, testing of new method for breast cancer detection by, 68

V
Virtual focus groups, 300

W
War, response to, informatics' role in, 1
Web logs, Blog Talk conference on, 64
Web site development, 143
Web sites. *See* Internet
Workstations, applying ergonomics to, 150
